

## EPRM is available now

Department of Defense personnel who need to conduct OPSEC assessments can obtain an EPRM user profile. EPRM's OPSEC dataset has the same functionality as the Operations Security Collaboration ARchitecture (OSCAR) program, which EPRM replaced.

Air Force participants in the User Evaluation Test (UET) of the multi-disciplinary dataset can get an account through their Base Assessment Manager.

## Do I qualify for an EPRM account?

To register for an account there are two options:

1: Email the following information to the helpdesk at [EPRMhelp@alionscience.com](mailto:EPRMhelp@alionscience.com):

- Name
- Commercial phone number (not DSN)
- Service or Component
- Major command (if Air Force)
- Installation (if Air Force)
- NIPRNET e-mail
- SIPRNET e-mail

2: Go to the EPRM login page and “Request a User Profile”.

- <https://eprm.csd.disa.smil.mil> (on SIPRNET)

- Click on “Request a User Profile” and follow the on-screen instructions.

- An auto-generated message from your Microsoft Outlook client will be created with the required information that will need to be sent to the EPRM Helpdesk.

Once the helpdesk has received the request (either on NIPR or SIPR), one can expect that within 2 business days the user profile will be created. Upon the user profile being created, an auto-generated message from EPRM with login information will be sent to the requestor’s SIPRNET email. If this email with login information is not received, please allow up to two days after submitting before contacting the helpdesk.

**Additional information:**

- Additional information and user guides are available at the unclassified EPRM information portal:

<http://EPRMhelp.countermeasures.com>

- EPRM helpdesk can be reached at [EPRMhelp@alionscience.com](mailto:EPRMhelp@alionscience.com).
