BUPERS Uses New System for Message Delivery

The Bureau of Naval Personnel (BUPERS) and Navy Personnel Command (NPC) announced they will transition to a new message system beginning in August.

According to NAVADMIN 249/10, all unclassified message traffic from BUPERS and NPC, including permanent change of station orders, will be sent via command e-mail. This change is a result of the Navy ending support for the Defense Messaging System (DMS).

To create as transparent a change as possible, BUPERS is fielding a new system called Government Official Information Exchange System (GOES). The GOES system will act as a router for all BUPERS official information destined for command email or other web based applications. All commands that have set up delivery paths within GOES will receive official information from BUPERS via command email.

GOES also supports Sailors stationed in non-Navy billets such as those in Individual Augmentee assignments.

As Official Information Exchange technologies become more prevalent within the Navy, and commands commence transition to GOES, assistance will be available to minimize impact to their receipt of official information from NPC and BUPERS.

GOES will continue to deliver information to BUPERS On-Line so users will still be able to access messages posted there.

For more information about OIX or to set up a command e-mail, visit <https://www.portal.navy.mil/oix/default.aspx>.

For more information about GOES or to activate command accounts, visit <https://goes.persnet.navy.mil> after Aug. 1.
