

Captain's Call

Navy Releases Updated SRB Award Levels

The Navy has released the latest Selective Reenlistment Bonus (SRB) award levels, effective Feb. 1 for eligible Sailors reenlisting in zones A, B or C, in a naval message.

This message updates the SRB multiples the Navy released in November in naval administrative message (NAVADMIN) 260/04.

The multiples for 33 ratings in both zone A and B increased over the previously published levels. Sailors in zone A have less than six years of service, while Sailors in zone B have between six and 10 years of service.

In zone C, Sailors who have been in the Navy between 10 and 14 years, there were 37 ratings that showed an increase in award levels.

Several ratings now have an SRB in certain zones where previously none existed: quartermasters, zones A, B, C; cryptologic (technician) technical, zones B and C.

Aviation boatswain's mate (fuel), aviation boatswain's mate (handling), engineman, damage controlman and hull technicians now have SRBs in zone A, as well.

Sailors whose SRB levels decreased have a 30-day grace period to reenlist at the higher rate. Compared to the November message, there were 13 ratings in zone A that decreased, 15 ratings in zone B and three in zone C that also decreased. The decreases go into effect March 3.
